KT's is proud to announce that we are the only authorized provider of SaferWatch in NJ!

On February 6, 2019, NJ Gov. Phil Murphy signed into law "Alyssa's Law." This law states that all primary and secondary schools within the State of New Jersey must install a "Panic Alarm" device that can silently and directly notify law enforcement of a life-threatening or emergency situation requiring their response.

Why SaferWatch?

SaferWatch is a 11-in-1 emergency response application that modernizes the way we interact with first responders. Their technology interconnects citizens with law enforcement within one application in seconds saving precious time during incidents.

A Higher Level of Safety for everyone

With an increasing number of threats, mass shootings, and unthinkable incidents, government officials, parents law enforcement officers, administrators, and first responders need to do everything in their power to protect people. The significance of the SaferWatch app is that it saves time, a valuable tool when seconds count. With a smartphone, the user can send an alert to multiple agencies in the event of an emergency.

With more complete intelligence, staff, first responders, and law enforcement can investigate suspicious activity, prevent critical incidents, and reduce response times to provide a higher level of safety for everyone.
